

Q: Where will the new Collinsville area school be located?

A: The school will be located at the center of the Collinsville school district on state route 108 (Figsboro Road). This will make travel to and from school more equitable for all students in the Collinsville district.

Q: How was the property selected?

A: The site selection committee solicited proposals from local landowners via local media outlets. Once the proposals were received, the committee reviewed the feasibility of each property and determined that the proposal for the chosen site was most appropriate for the safety and needs of the students in the Collinsville district.

Q: How will the school be funded?

A: Henry County Public Schools and the Henry County Board of Supervisors are working together to ensure that financing is available to fund the construction of the school facility without asking taxpayers to contribute beyond their current tax obligation.

Q: Will changes be made to Figsboro Road to accommodate the school and additional traffic?

A: During the school facility design and construction process, the design team will work with VDOT to make improvements to Figsboro Road. These changes will potentially include turning lanes and right of way entrances/improvements to ensure compliance with VDOT standards regarding line of sight.

Q: How many students are currently transported on Figsboro Road each day?

A: We transport approximately 50 students on Figsboro Rd. each day, plus an additional 25 students who attend CCL for a total of approximately 75 students.

Q: Will the community have access to the school facility?

A: The design team is working to ensure that there will be ample parking, recreational fields, and walking trails for the school community to enjoy once the school opens.

Q: To whom should inquiries be made regarding the phases of the school's construction?

A: Questions may be sent to publicinformation@henry.k12.va.us or you may call Mr. Bill Bullins, Assistant Superintendent of Operations and Administrative Services, at 634-4741.
